BUSINESS REVIEW AND PROSPECTS

For the year under review, the Group's rice core business in Hong Kong continued to perform satisfactorily. The rice market operating environment remained challenging as the severe market competition among major market operators persist. Higher labour cost and manufacturing overheads continued to pose pressure on the profit margin. To improve the performance of the Group and bring sustainable returns to shareholder, the Group keeps on leveraging its strength in its market leadership, enhancing all areas of operation, from marketing and product innovation to operational processes, and achieving cost effectiveness in a steady and balanced manner, so as to sustain the Group's competitiveness and profitability.

In Vietnam, the Group's Circle K convenience store business is progressing as planned. We continue to stay focus on expanding of our store network to accelerate the reach of the critical mass. We are actively expanding the product category by sourcing not only domestically but also directly across ASEAN countries so as to broaden product category and enhance category awareness. The Hot-Food-Eat-In service has been overwhelmingly received by customers and is the main driver of revenue and margin growth. We continue to launch innovative marketing initiatives and promotional programs to enhance Circle K brand preference among convenience store users. To enhance international sourcing initiative and logistics support, a distribution centre was set up with a view to strengthening its supply chain management given its increasingly growing store network. With these strategies, coupled with a consistent effort to maintain high standard of customer service, we were able to sustain its sales growth momentum and report an encouraging growth in comparable store sales for the year under review. The recent riot across Vietnam targeting foreign factories sparked by the territorial disputes between Mainland China and Vietnam had no impact on our convenience store business. Our Vietnam convenience store business is developed and managed by a team of proficient professionals who are industry pioneers. They have already built up a retail management team with local capable staff to operate the convenience store business there. We have expedited the localization program so that the retail management team is professionally competent to operate the business and meet the business challenges ahead. We believe and invest in people. We are confident that our Vietnam convenience store business will generate good return for our shareholders in the long run.

After the financial year ended 31st March, 2014, the Group entered into the sale and purchase agreement to dispose of its entire 28% interest and the shareholder's loan in an associate company for a total consideration of HK\$107,183,362. Subject to audit, the disposal represents a gain of approximately HK\$42 million, and the gain will be recorded in the financial year ending 31st March, 2015. The completion took place on 31st May, 2014.

During the year, the Group maintained a stable and healthy financial position with strong net cash inflows. As of 31st March, 2014, the Group had net cash and bank balances to the extent of HK\$155 million. With a sound financial platform, we will continue to explore attractive projects that will enhance shareholder value. We are optimistic about overall business prospects.

Looking forward, the Golden Resources Group continues to sustain its long-term growth by strengthening its existing business and seeking attractive investment. We will continue to pursue quality investments which promise a positive return and good potential to create further value for shareholders. We are confident in the Golden Resources Group's business prospects.
